

Informatica & IICS Course syllabus

Module 1 - Data Warehousing overview

- What is Data warehousing
- Data warehousing Architecture
- Fact table & Dimension table
- Star (vs) Snowflake schema
- Slowly changing dimension (vs) Rapidly changing dimension
- Types of Integration - SCD Type 0,1,2,3
- OLAP & OLTP

Module 2 - Informatica key concepts

- Designer, Repository, Workflow Manager & Monitor
- What is Integration Service?
- Using Parameter file
- Types of loading
- Versioning
- Mapping Parameter (vs) Mapping variable
- Surrogate key
- Demonstration of SCD Type 0,1,2,3
- Quick walk through of various transformations

Module 3 - Informatica Transformations

- Aggregator Transformation
- Custom Transformation
- Expression Transformation
- External Transformation
- Filter Transformation
- Joiner Transformation
- Java Transformation
- Lookup Transformation
- Normalizer Transformation
- Rank Transformation
- Router Transformation
- Sequence Generator Transformation
- Sorter Transformation
- Source Qualifier Transformation
- SQL Transformation
- Stored Procedure Transformation
- Transaction Control Transformation
- Union Transformation
- Update Strategy Transformation
- HTTP Transformation
- Webservices Transformation
- XML Parser
- XML Generator
- Hierarchial Parser

Module 4 - Useful Topics for better understanding

- Various use cases & Real time scenarios
- Debugger
- Informatica Admin Console
- Informatica Jobs using Command Line

Module 5 - Performance Tuning concepts

- Push down Optimization
- Partitioning
- Indexing

Module 6 - Informatica Cloud Overview

- Informatica Cloud
- Object Synchronization (vs) Process Synchronization
- Data Replication overview
- Informatica Cloud Applications

Module 7 - Informatica Cloud Secure Agent & Architecture

- IICS Architecture overview
- Secure Agent introduction, setup & Architecture
- Running Agent as Local/Network User
- Side note - IN-OUT Parameter (vs) Input Parameter

Module 8 - List of IDMC services - Spotlight on IICS**Module 9 - Tasks & Task flows**

- Mapping Task
- Synchronisation Task & Replication Task
- Masking Task, Powercenter Task & Dynamic Mapping Task
- Data transfer task
- Linear Taskflow
- Parallel Tasks & Parallel tasks with Decision
- Sequential Tasks & Sequential Tasks with decision

Module 10 - Other components

- Business services
- Saved query
- Hierarchical schema
- User-Defined Function
- Shared sequence
- File Listener

Module 11 - Spotlight on Key transformations

- Data masking
- Hierarchy builder & Hierarchy parser
- Structure Parser
- Web services

Module 12 - Must-Know concepts

- REST API
- Swagger file
